Starface

Starface

About Starface

STARFACE is an award-winning VoIP based telephony system that is “Made in Germany”. It integrates completely into the IT and communications infrastructure of your business, is based on open standards and can be used in Windows, Linux and Mac OS X environments.

With our platforms, we have the perfect product for every size of company. You can choose between five different hardware appliances or our cloud-based telephony system, or you can even host a virtual edition of the system yourself.

See below for a list with supported features when using the Gigaset PRO IP Devices connected behind a Starface PBX.
