

February 3, 2012

Greetings,

BroadSoft is pleased to announce that the Gigaset Corded IP Pro has been formally validated with BroadWorks. The device model(s) listed below have been validated as interoperable with the BroadWorks SIP interface. Any issues and limitations identified during the interoperability testing are documented in the BroadSoft Partner Configuration Guide (PCG) *PartnerConfigGuide Gigaset Corded IP PRO*. The PCG is available to BroadSoft customers on the BroadSoft Xchange website, <http://xchange.broadsoft.com>.

BroadSoft validates that the device works properly with the BroadWorks SIP interface. BroadSoft does not validate qualitative aspects of the device or other device capabilities, which are outside the scope of the SIP signaling interface.

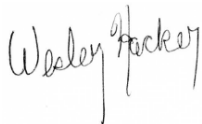

The validation covers the Gigaset release(s) and BroadWorks version listed below. Other releases tested previously are documented in the PCG.

Gigaset DE310 IP Pro  
Gigaset DE410 IP Pro  
Gigaset DE700 IP Pro  
Gigaset DE900 IP Pro

Gigaset version bl\_1.00.05 \*  
BroadWorks Release 17.0

\*This validation also applies to all subsequent maintenance releases to this device version.

Thanks,
