Gigaset pro

N870/N670 - Vodia

This quick start guide demonstrates key features of the Gigaset DECT handsets connected to the Vodia platform and is designed to help you learn the basics quickly.

Please note that most of the functions described here depend on the features assigned to the account to be used with the telephone. Some of the features can be configured and enabled by you and/or by your administrator.

- Basic Call Features
- Call Transfer Attended
- Call Transfer Un-Attended
- Call swapping
- Blind transfer
- Conference Call

Additional Information

Additional information is available and can be found: <http://wiki.gigasetpro.com>

! This quick start guide is based on the software dd: September2019, N670/N870 Software 2.23.0 and the then available Vodia Gigaset offers different DECT (pro) handsets.

Call Transfer Attended

When using attended transfer, you first make sure that the contact where you want to transfer the call, is available and willing to answer this call. There is first a 2 way conversation before you transfer the call.

- > You have an active call.
- > During the call press the Left Soft key **Ext. Call** to put the call on hold.
- > Enter the phone number.
- > Wait until the call is answered and you announced the call.
- > Hang up to **transfer** the call.
- > Or press **up & down**  to swap between the calls.

Blind Transfer

When using Blind transfer, you transfer the call without announcing it to the other party. The call is transferred with one key press.

- > You have an active call.
- > During the call press the Left Soft key **Ext. Call** to put the call on hold.
- > Enter the phone number.
- > Press the Right Soft key **Transf.** to transfer the call.

Call Transfer Un-Attended

When using un-attended transfer, you transfer the call without announcing it to the other party.

- > You have an active call.
- > During the call press the Left Soft key **Ext. Call** to put the call on hold.
- > Enter the phone number.
- > Wait until you hear the ringing tone.
- > Hang up to **transfer** the call.

Call Swapping

- > You have an active call.
- > Press **up & down**  to swap between the calls.

Gigaset pro DECT handsets - Vodia

Conference Call

You can set-up a conference call to talk to two participants at the same time.

- > You have an active call.
- > During the call press the Left Soft key **Ext. Call** to put the call on hold.
- > Enter the phone number.
- > Wait until the call is answered.
- > During the call press the Left Soft key **Conf**.
- > The conference is enabled, you now can talk to both parties.
- > With the Left Soft key **End Conf**, you place one party on hold and can talk to the other party.
- > Or press the **End call** key  to disconnect both parties.
