

# FAQ Nx70 - Central phone-book.

## Introduction

The N870/N670 has a central phone book for

- 2000 entries or
- 2MB file size

The phone book can be imported via the:

1. Web-interface
2. After time set via Provisioning
  - a. Location
  - b. RenewPeriod

Under development: Download phone-book after reboot and auto-provisioning

[Click here](#) for an Excel file that generates an phonebook.xml file you can import.

Valid for:

N670

N870

## File format

The phonebook file has the following format, example:

```
<?xml version="1.0" encoding="utf-8"?>
<!DOCTYPE LocalDirectory>
<list>
<entry home2="" surname="Lastname" mobile1="" mobile2="" office1="0049123456789" office2="" name="Firstname" home1=""/>
<entry home2="" surname="User" mobile1="0049987654321" mobile2="" office1="" office2="" name="First" home1=""/>
</list>
```

Download an example template. [N870LocalPhonebook 1999 Contacts.xml](#)

## Web-interface

Go to: **Settings - Online Directories - Central Phonebook.**

You can select the phonebook (XML) file to upload.

Enter the URL and Daily Refresh Time via the Web-interface.

### Central phonebook

Enable directory

Directory name ⓘ

Server address ⓘ

Daily refresh time ⓘ

Enable list mode ⓘ

### Load phonebook from PC

Phonebook file ⓘ

### Phonebook download

### ⓘ Important

The central phonebook needs to be enabled + set before the phonebook file can be uploaded!

The server address needs to be in full. Example: <http://192.168.178.201/phonebook.xml>

## Auto-provisioning

```
<?xml version="1.0" encoding="UTF-8"?>
<provisioning version="1.1" productID="e2">

<firmware>

</firmware>

<nvm>

<param name="Netdir.21.Activated" value="1"/>
<param name="CentralBook.0.Name" value="Central Phonebook"/>
<param name="CentralBook.0.ServerURL" value="http://192.168.178.201/phonebook.xml"/>
<param name="CentralBook.0.DownloadTime" value="14:00"/>
<param name="CentralBook.0.StartWithList" value="1"/>

<!-- Maximum search results for Central Phone-book max. 99 because of handset limitation
<param name="CentralBook.0.MaxSearchResult" value="99"/>

-->

<!-- Assign phonebook to INT key for handset with IPUI 02b6ec8aa5 -->

<param name="hs.02b6ec8aa5.IntKeyDir" value="30"/>

<!-- automatic lookup -->

<param name="hs.02b6ec8aa5.AutoLookupDir" value="30"/>

</nvm>
</provisioning>
```
