

# FAQ Maxwell - Background picture.

## Introduction

Here we describe how you can change the back ground picture of the Maxwell 4.

Background picture:

- Size: 480\*272
- Format: png and jpg
- Rescale can be done by the device but quality will be less
- If multiple pictures are selected, refresh is done every 180 seconds
- Maximum file size is 1MB

The back ground picture can be changed via:

- WEB-interface
- Auto-provisioning

Valid for Maxwell			
Basic	2	3	4

## WEB-interface

Open the web-interface of the Maxwell 4, go to: **SETTINGS - DESK Phone - Pictures**.

You can upload your own background picture or select one of the default pictures.

The screenshot shows the Gigaset web interface. On the left is a dark sidebar with 'SETTINGS' and 'STATUS' tabs. Below 'SETTINGS' are menu items: Network, Telephony, Online Directories, Online Services, Desk Phone (expanded), Main Menu, Ringtones, Display, and Pictures. The main content area is titled 'Pictures' and contains the following settings:

- Screensaver Activation: 20 min.
- Screensaver: Analog clock
- Stored Pictures table:

Pictures	Idle Screen
 Name: city.jpg Size: 140 KB	<input checked="" type="checkbox"/>
 Name: felt.png Size: 277 KB	<input type="checkbox"/>

In the IDLE Screen column you can define which Picture is used, or when multiple pictures are selected then they will be switched every 180 seconds.

## Auto-provisioning

The following provisioning parameters are available.

Parameter	Description
DownloadWallpaper	URL to the file that contains the back ground image This is placed in the <custom> </custom> part
PhoneUI.Settings.SelectedWallpaper	The name of the background picture that should be used. This is placed in the <nvm> </nvm> part

Example:

```
<?xml version="1.0" encoding="UTF-8"?>
<provisioning version="1.1" productID="mx3b">

<custom>
<step type="DownloadWallpaper" url="http://192.168.178.201/logo/picture.jpg" />
</custom>

<nvm>

<param name="PhoneUI.Settings.SelectedWallpapers" value="picture.jpg"/>

<!-- Multiple pictures should be comma separated
Example: <param name="PhoneUI.Settings.SelectedWallpapers" value="picture.jpg,green.jpg"/>
-->

</nvm>

</provisioning>
```
