

# Software T300/T500 PRO

Updating the Software of the T300/T500 can only be done online.

Go to: **Configuration** -> **Server** -> **State**

Newer versions to update your software will be listed with:

[Search now](#)

Prior to the actual update process a backup of the system will be performed. In case of a failure during the update the current state of the system will be recovered without loss of data.

## Update notification:

If this setting is enabled, the system will perform a weekly check for a new software version. In case an update is available, the administrator will receive an automated e-mail containing the details of the new version.

**Software 5.3.0.7**

**Software 5.2.0.10**

**Gigaset windows Client**

**Gigaset MAC Client**
