Current Version: 5.3 Last Update: Jan 23, 2013

Build Version: 5.3.0.2 Updates: Update Search now

Build Date: Jan 17, 2013 Notify for update: activate

Language

Default: Nederlands

Server Status

Services: Restart

Server: Restart Shutdown

Prior to the actual update process a backup of the system will be performed. In case of a failure during the update the current state of the system will be recovered without loss of data.

Update notification:

If this setting is enabled, the system will perform a weekly check for a new software version. In case an update is available, the administrator will receive an automated e-mail containing the details of the new version.

Software 5.3.0.7

Software 5.2.0.10
