

FAQ Nx70 - License: Activate the license

Upload the new License

In the Integrator web-interface go to **SETTINGS - System - Licensing - Licence - Browse**

Select the License file you received from Gigaset.

Click **Upload**

Your license is now enabled.

The screenshot shows the Gigaset web interface. The left sidebar is expanded to 'System' > 'Licensing'. The main content area shows the 'Licence' section. A table lists items under licensing:

Item under Licencing	Available Licences	Used Licences	Status
DECT Manager - Multi cell	4	0	Activation period. Days left: 35
Virtual Integrator	n/a	n/a	Activation period. Days left: 35

Below the table, there is a 'Request File' section with a 'Create Request File' button. In the 'Licence' section, a file named 'license_request_589EC60E71C...' (14 KB) is listed with an unchecked checkbox, indicating it is not yet activated. There are 'Browse...', 'Upload', and 'Remove queue' buttons.

This screenshot is identical to the one above, but the checkbox next to the file 'license_request_589EC60E71C...' is now checked, and the status in the table has changed to 'Licence activated'.

Item under Licencing	Available Licences	Used Licences	Status
DECT Manager - Multi cell	4	0	Licence activated
Virtual Integrator	n/a	n/a	Licence activated
