About Panasonic

Panasonic starts with a desire to create things of value. As hard work and dedication result in one innovative product after another, the fledgling company takes its first steps towards becoming the electronics giant of today.

See below for a list with supported features when using the Gigaset N510 IP PRO or N720 IP PRO as a DECT cordless system behind a Panasonic pbx system.

All tests were performed by the Gigaset pro support team.

Version of the PBX-system: **Panasonic KX-NCP500** (Panasonic does not support any SIP devices behind the KX-NCP500)
A better interop is expected against the new **Panasonic NS1000** system
