N720 IP PRO Release notes 68

Release date:

03-2013

Version:

68

What's new:

Provisioning:

- Broadsoft-Provisioning:
  Download configuration files over HTTP using BroadWorks Device Management (MAC or digest authentication can be used).
  Following HTTP download scenarios are supported with the BroadWorks XSP topology permutations: XSP IP Address, XSP FQDN, XSP Cluster FQDN

- Plain XML provisioning

Gigaset PBX T500 PRO / T300 PRO

- Info page can be accessed without password, needed for Auto-provisioning.
- Ad hoc conference supported
- Gigaset PBX Manager supported by PRO handsets (SL610H PRO, S510H PRO). Feature control via handset menu:

  - Identity management / Hot Desking
  - Calls lists
    - missed
    - incoming
    - outgoing
  - DND
  - Selection of CLIP number to be shown
  - Group call settings
  - Call divert
  - Visual Voicemail
  - Selective phonebook search for all available directories (also LDAP)

- Corporate directory: now also "business number" is supported

MWI signaling on handset

- Enable/disable MWI notification for each handset individually
- Configure the MWI notification for different message types: missed calls, alarms, E-Mail, mailbox
- Missed/accepted calls count can be deactivated for each handset

Enhancements:

- DECT range extension by architectural improvements
- Call Manager: 'Accept calls via Handsfree' is now default setting in Web Configurator
- Handset registration PIN can be defined by admin (e.g. 0000 for DECT headset registration).
- Handset model name and software version is shown for registered handsets in Web Configurator
- Operating days counter is no longer reset to 0 after firmware FW update
- Supplementary services: Now also control codes leading with # can be dialed
- Access Code usage conditions can be selected: always / Net Directories / Call Lists / Net Directories and Call Lists / never
- TCP port number: After start-up no longer always the same TCP port number is used, but is randomly assigned

Directories

- Corporate Net Directory search (LDAP,): Show search string in handset and update results accordingly
- Net directory: length of URL enhanced to 255 characters
- Public Net Directory search: Entries for city are no longer shown on all handsets, but only on handset where they have been entered

- LDAP Directories:
- In the Web Configurator you can specify now, which of the available attributes from the LDAP database are to be queried and displayed on the phone
- User can scroll through list of found entries
- Attribute ‚streetAddress' added
- Search string length enhanced to 250 characters

BugFixes:

- Broadsoft provisioning: It is now possible to download .xml file from Broadsoft server when digest username/password authentication is used

Known Issues:

- ....
