## About NEC

NEC Enterprise Solutions provides IT & Communication solutions to small, medium and large enterprises to maximize business efficiency. See below for a list with supported features when using the Gigaset IP devices behind an NEC SV8100 PBX system.

All tests were performed by the Gigaset pro support team.

Call completed elsewhere	No	No	No	No
Auto provisioning	No	No	No	No

\*Call waiting works from external calls routed directly to the extension number

### Very important:

To use our VoIP DECT system (N720/N510) with this PBX the VoIP board IPLB must be used.

The DExxx phones function with either the IPLA board or the IPLB board.

NEC cannot be considered as a full IP-PBX and some features are available only with proprietary phones that have specific function keys or with analog phones with codes (example: anonymous calls or three-way call /Conference).
