

T640 T440 Release notes 1.1.3

Release date:

June 2016

Version:

1.1.3

Important

If you come from a software version below 1.0.9, the Media-gateway will be updated with new firmware (Improved fax support). This means when the update is started, the Media-gateway will reboot 3 times after the update is ready. The update of the Media Gateway takes ca. **15 minutes**.

!!! A system reboot is necessary when the IP-phones can't register to the PBX system !!!

New Gigaset DE900/700/410/310 **02.01.00** software is delivered with this software. To avoid upgrade errors during the reboot of the Media-gateway, the automatic device firmware update will be disabled.

You have to enable this after system is up and running via the menu **system Settings - Provisioning**

What's new:

- Parallel ringing - webui checkboxes in system settings for new feature
- Maxwell 3 and basic to the list of devices for the provisioning groups/parameters/keys
- Maxwell 3 and basic are using the display-name from the system settings
- Maxwell 3 and basic XML services working
 - Call lists synchronized
 - Missed calls
 - Outgoing calls
 - Accepted calls
 - BLF keys synchronized
 - Call divert status in idle screen
 - Call divert setting (always) via phone menu
 - PBX phonebooks accessible via longpress on directory-key
 - Internal
 - Global
 - Private
 - Firmware update working (see details [here](#))

Enhancements:

- Several default values are changed to more usable values
- Search function in N510 phonebooks is improved
- Several wording corrections for dutch, english, italian, spanish and turkish

BugFixes:

- Hunt Group: Call transfer from a hunt group is working
- Hunt Group: Call forward on no answer is working

Known Issues:

- Contacts: Email field for private contacts is mandatory (will be optional in a later release!)
- Parallel ringing - Checkbox for external forwarding is not working
