

Device Firmware update module

Introduction.

This module will enable you to put the latest device software on the Gigaset T300/T500. The devices can download the software from the PBX automatically.

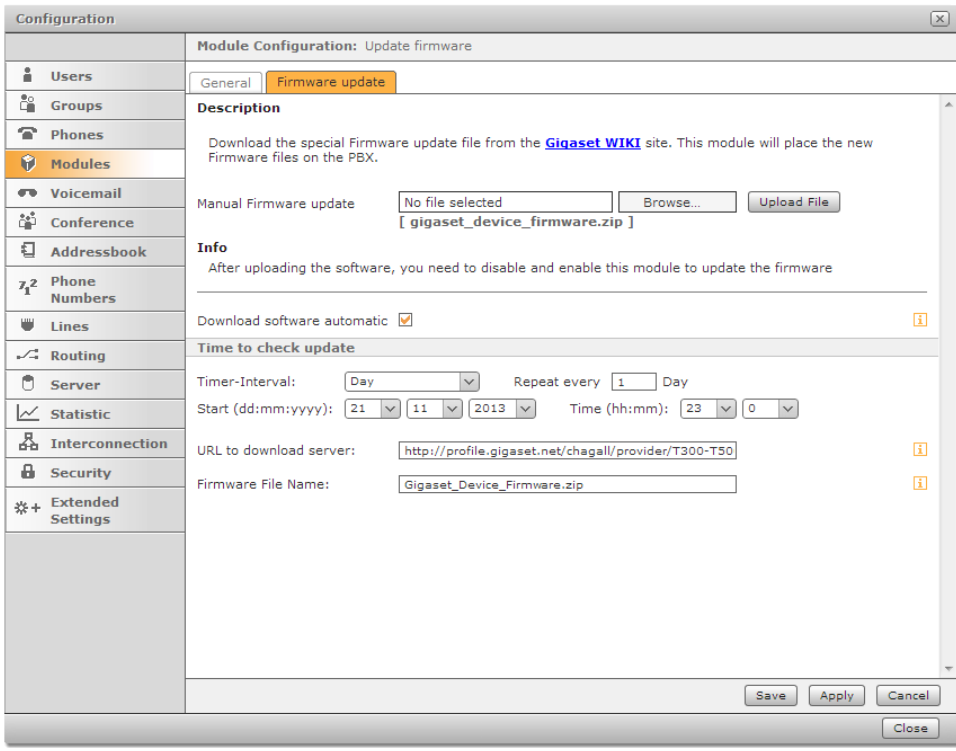

The module can upload the software:

- Manual by selecting the file (No internet available)
- Automatically from Gigaset server
- Automatically from your own http server
- Online check for new firmware will be done automatically every .. time.

Important

If automatic update procedure PBX is enabled, devices will be updated automatically without your knowledge. **Advice is to disable this option** when the module is used and enable when Firmware updates are required/requested.

File will only be downloaded if file on server is newer than local file.

Default server URL will point to Gigaset server and will contain latest of fiscal release as defined firmware.
