

Maxwell 10 DECT

Introduction

Maxwell 10 has an integrated DECT interface that allows you to connect the Gigaset DECT handset or an DECT headset.

Important

It is not recommended to register a standard DECT handset.

DECT Specifications

- GAP

Supported DECT devices

- Gigaset Maxwell DECT handset
- 3rd party DECT headsets

Supported Features

- Answer incoming call via Keypress
- Auto answer incoming call (depends on settings)
- Make outgoing call
- Mute (Headset feature)

Gigaset Maxwell DECT handset

The Gigaset Maxwell DECT handset has to be assembled, [see here for more info](#). After assembly the handset has to be [registered to the Maxwell 10](#).

DECT headset

It is possible to register a DECT headset direct to the Maxwell 10 without using the DECT headset own Base station. Gigaset will create a list with Headsets that are tested and will put this information on this wiki.
