## How to update:

### Via device menu

### Via the webpage:

1. Settings » Management » Firmware update
2. Enter the URL for the new firmware in the **Data server** field: <http://profile.gigaset.net/device>
3. Click on the button: **Update firmware**

Network	<b>Firmware Update</b>	
Telephony	Data server:	<input type="text" value="profile.gigaset.net/device"/>
Messaging	User defined firmware file:	<input type="text"/>
Info Services	Automatic check for software updates:	<input checked="" type="radio"/> Yes <input type="radio"/> No
Directories		On starting the firmware update, the device checks if the requirements of a successful firmware download are fulfilled. The firmware is then downloaded without additional feedback. During the download and update, the handset / base connection is lost. A successful update results in the handset re-establishing the base connection.
Management		<input type="button" value="Update firmware"/>
