<b>Addressbook</b>	Default: Nederlands
<b>Phone Numbers</b>	<b>Server Status</b> ⓘ
<b>Lines</b>	Services: Restart
<b>Routing</b>	Server: Restart   Shutdown
<b>Server</b>	

Prior to the actual update process a backup of the system will be performed. In case of a failure during the update the current state of the system will be recovered without loss of data.

### Update notification:

If this setting is enabled, the system will perform a weekly check for a new software version. In case an update is available, the administrator will receive an automated e-mail containing the details of the new version.

**Software 5.3.0.7**

**Software 5.2.0.10**

**Gigaset windows Client**

**Gigaset MAC Client**
