

FAQ Nx70 - Blind Transfer

Introduction

From software 2.38.0 or higher, the option is added to disable the Blind transfer option in the DECT handsets.

This can be activated via auto-provisioning and is created for VoIP platforms that do not support Blind Transfer.

Auto-provisioning

Parameter	Description
SipProvider.<0-9>.BlindTransfer	0 = Disabled 1 = Enabled (Default)

Example:

```
<?xml version="1.0" encoding="UTF-8"?>
<settings version="1.0" productID="e2">

<param name="SipProvider.0.BlindTransfer" value="0"/>

</settings>
```
