

N870 IP PRO

The scalable DECT IP multicell system for seamless mobile communication in SMB and beyond. Enabling freedom of movement.

The image shows a woman in a grey dress and high heels walking in a modern office, talking on a mobile phone. In the foreground, a white Gigaset N870 IP PRO base station is visible. The background features office desks, chairs, and large windows.

Alarming, Messaging and Location (AML)

Alarm systems are used to inform users about events, which

Alarm systems can send messages, request for an user response and even ask the location of the DECT handset. With the advanced message options, alarm servers can set per message: text, icons, colors, softkeys, priority and many more.
