

FAQ Nx70 - Messaging "17 Delete messages from Message list"

Introduction

If allowed by the administrator, the user can delete messages from the message list.

Via a new MQTT command, the user is allowed (or not) to delete messages from the message list.

Open the message list, select the message, click on **Options** and depends on the message option send by the AML server, the message can be deleted yes or no.

Requirement:

- N870/N670 software 2.44.0 or higher
- R700H PRO / S700H PRO / SL800H PRO with software version 10.04 or higher
- Other (PRO) handsets do not support this feature
- MQTT command: "deletable": "yes",
