

FAQ SL800H / S700H / R700H - Basic Registration

Introduction

In the handset menu go to:

Settings - Registration - Basic Registration

When Basic registration is started, the handset will start a pure GAP DECT registration. (Make and Receive calls only) This can be used when registering against very old incompatible Base-stations.

We will list on this FAQ page the Base-stations where this should be used. For now, the list is empty.

- No devices listed
- ...

Normal DECT Registration is started using the menu: **Settings - Registration - Register handset**
