FAQ - Tel.search.ch phonebook

Valid for:	N610	N670	N870	N870E	Embedded Integrator	Virtual Integrator

Introduction

tel.search.ch is an up-to-date, fast and free phone-book for Switzerland.

This phone-book can be used with:

- N510
- N720
- N670
- N870
- Maxwell desktop phones

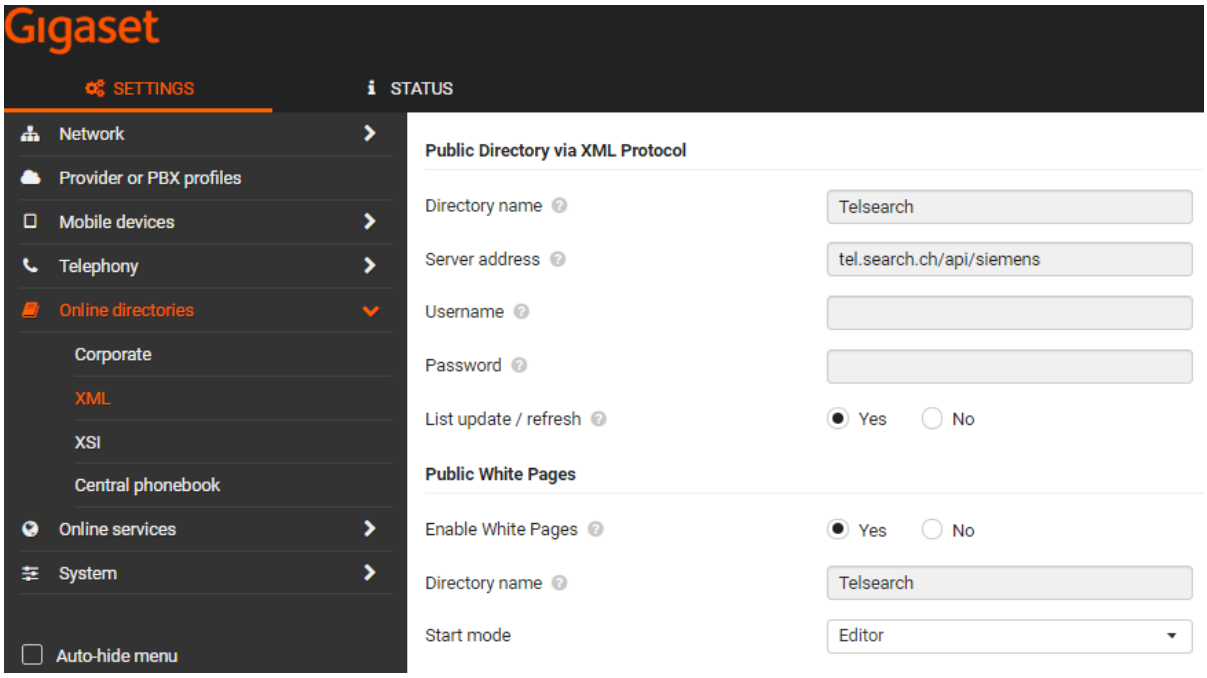
The N510 and N720 have a switch in the web-interface to enable this phone-book, in the other devices you need to configure this manually or via auto-provisioning.

N670/N870 configuration example

Open the web-interface and go to: **SETTINGS - Online directories - XML -Public**

Configure the **Public White** pages using the settings described below.

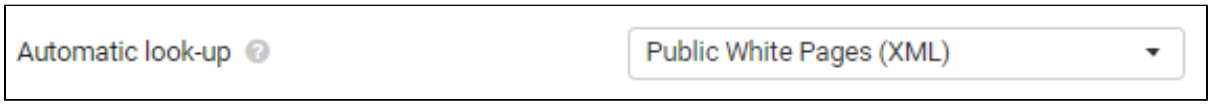
- **Directory name**: Telsearch
- **Server address**: tel.search.ch/api/siemens
- **List update / refresh**: Yes
- **Enable White page**s: Yes
- **Directory name**: Telsearch
- **Start mode**: Editor



Enable **Automatic look-up** for the DECT handsets

Go to: **SETTINGS - Mobile devices - Administration - Edit handset - Automatic look-up**

Change to: **Public White Pages (XML)**



Auto-provisioning

You can download the provisioning file and upload via the web-interface (**SETTINGS - System - Provisioning and configuration**).

provisioning file

```
<?xml version="1.0" encoding="UTF-8"?>
<provisioning version="1.1" productID="e2">

<nvm>

        <!-- tel search phonebook -->
        <param name="XMLDir.0.ProviderName" value="Telsearch" />
        <param name="XMLDir.0.ServerURL" value="tel.search.ch/api/siemens" />
        <param name="XMLDir.0.EntCount" value="0" />
        <param name="Netdir.4.Activated" value="1" />
        <param name="XMLDir.0.WhitePagesDirName" value="Telsearch" />
        <param name="XMLDir.0.StartWithListWP" value="0" />
        <param name="hs.@.AutoLookupDir" value="40" />

</nvm>
</provisioning>
```
