FAQ - Auto provisioning: Hide pages

Valid for:	N610	N670	N870	N870E	Embedded Integrator	Virtual Integrator

Valid for N610 / N670 / N870 / N870E.

Via provisioning it is possible to hide the web-pages listed below.

Supported pages:

- Provider or PBX profiles
  - Complete menu item
  - Section: General data of your service provider
- SIP accounts (N610/N670 from SW 2.52 - Internal telephony enabled)
  - Administration
- Mobile devices
  - Administration section: Personal provider data
- Telephony
  - VoIP
  - XSI Services
- Online directories
  - Central phonebook
- Online services
  - XHTML
- System
  - Web configurator
  - Provisioning and configuration
  - Firmware

Provisioning template

```
<?xml version='1.0' encoding='utf-8'?>
<provisioning version="1.1" productID="e2">

<nvm>

        <oper name="set_webui_visibility">

            <!-- value="hidden" to hide page, value="visible" to show page -->

              <!-- hide firmware page -->
              <param name="menu.settings/system/firmware" value="hidden" />

              <!-- show firmware page
              <param name="menu.settings/system/firmware" value="visible" /> -->

              <!-- hide Central phonebook page -->
              <param name="menu.settings/online-directories/central-phonebook" value="hidden" />

              <!-- hide XHTML page -->
              <param name="menu.settings/online-services/xhtml" value="hidden" />

              <!-- hide Provider or PBX profiles page -->
