

Maxwell 3 / 2 / Basic PRO - Release 3.17.4

Release Date:

June 2020

Version: RELEASE

mx3-3.17.4-release

What is new?

- [Enable / Disable dialtone](#)
- [Display - Night mode setting](#)

Enhancements

- Missing audio during the start of a call.
- After executing a code procedure with # characters the feedback has wrong characters %23
- SIP passwords need to be stored hashed in the phone
- Add option "Call Divert" to display keys
- Improved interop behind Unify OSbiz systems
- [Manual NAT](#)
- [Provisioning of emergency numbers](#)
- [Automatic reboot via auto-provisioning is now possible](#)

Bugfixes

- Maxwell 23b are frozen after long-time no-use
- Access Code for the numbers from directories

Known Issues

- When using TLS behind OSbiz then a Gigaset.net CA signed certificate is needed
- Door-station video when signaled as second incoming call is not shown. Also open door button is then not functional.
