

# FAQ - MAC-ID

Valid for: N610 N670 N870 N870E Embedded Integrator Virtual Integrator

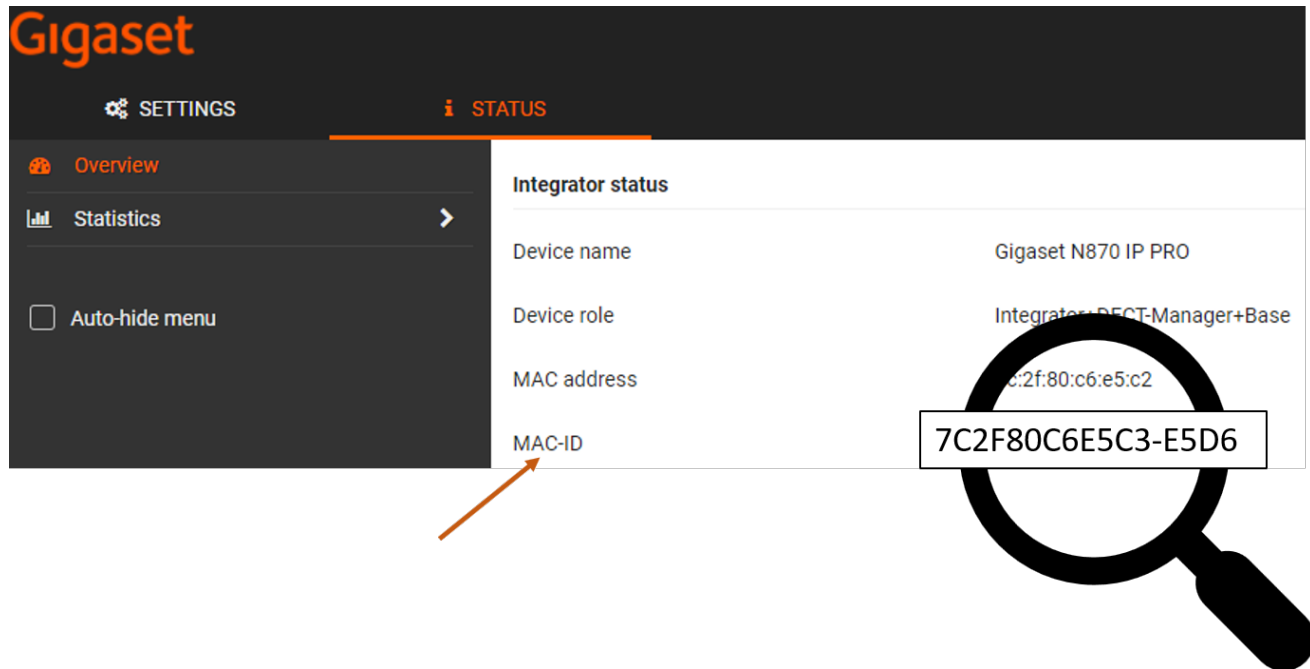

## Introduction

The MAC-ID of an Gigaset device can be found:

1. Packaging
2. Web-interface

It contains of the 12 digits MAC address and a 4 digit code. This is programmed in the factory and the combination between the MAC address and the 4 digit code is unique.

Below an example where to find it in the web-interface.

The MAC-ID is used for services like:

- License
- Redirect server
