

# SL800H / S700H / R700H - Software release 11

## Release Date:

- February 2022

## How to update

- Via Gigaset Quick Sync
- SUOTA

## What is new?

- Messaging
  - Blue AML icons (For this also a Nx70 software newer than 2.44.0 is needed to be released H1 2022)
- Feature key (For this also a Nx70 software newer than 2.44.0 is needed to be released H1 2022)
  - Action URL
  - Base station function
- Auto-provisioning
  - [Easy way to start auto-provisioning via softkey](#)
  - Limit provisioning file download retry to 1 time
  - [Nested profiles](#) not always downloaded
  - [Emergency dial config via provisioning](#)
  - media files provisioning: [pictures](#) , [media files](#)
- The volume of the ringtone can be changed per line (Internal/External/...) or for all lines
- Access to smartphone directory via BT
- Default messaging tone after handset reset settings - values for some melodies change

## Bugfixes

- Automatic provisioning did not start
- Translation updates
- Multiple bugfixes

## Known issues

- LED SOS blinking using feature key - alarm, stops when call is started
- USB port is not powered down, with the result: less talk and standby time
