

FAQ - Auto-answer call

Valid for:	N610	N670	N870	N870E	Embedded Integrator	Virtual Integrator
------------	------	------	------	-------	---------------------	--------------------

Introduction

Some VoIP platforms support Intercom/Broadcast groups, the platform can send an SIP INVITE with a special header that enables the phone to answer the call automatically.

The following headers for auto-answer are supported:

- Call-Info: <uri>;**answer-after=0**
- Call-Info: <uri>;**info=alert-autoanswer;delay=0**
- Alert-Info: <uri>;**info=alert-autoanswer**

Phone settings

You can define what should happen if an incoming call is received and this header is available in the SIP INVITE.

Go to: **SETTINGS - Mobile devices - Administration - Edit device - Call manager**

Call manager

Accept calls directly via Call Manager ?

No

Missed calls and alarms

Missed calls count ?

via Headset
via Handsfree

No

Calls via Call Manager, accept call directly:
