About Temeno

Control the unexpected - For more than 30 years Temeno creates digital soft- and hardware solutions for high performing alert- and crisis management to ensure the lightning fast distribution of warning- and alert campaigns in case of fire alert, evacuation events, medical emergency or technical difficulties. Together with our crisis conference software solutions, Temeno is among the largest application provider for alert campaign management software in the GSA region.

See below for a list with supported features when using the Gigaset Nx70 together with the Temeno solution.
