

Software T300/T500 PRO

Updating the Software of the T300/T500 can only be done online.

Go to: **Configuration -> Server -> State**

Newer versions to update your software will be listed with:

| Configuration | |
|--|---|
| <ul style="list-style-type: none">UsersGroupsPhonesModulesVoicemailConferenceAddressbookPhone NumbersLinesRoutingServer | Server Configuration |
| | State Time/Date Network Mail Server Web Server Backup Log files Licenses |
| | Software Version |
| | Current Version: 5.3 Last Update: Jan 23, 2013 |
| | Build Version: 5.3.0.2 Updates: <input type="button" value="Update"/> <input type="button" value="Search now"/> |
| | Build Date: Jan 17, 2013 Notify for update: <input checked="" type="checkbox"/> activate |
| | Language |
| | Default: <input type="button" value="Nederlands"/> |
| | Server Status |
| | Services: <input type="button" value="Restart"/> |
| | Server: <input type="button" value="Restart"/> <input type="button" value="Shutdown"/> |

Prior to the actual update process a backup of the system will be performed. In case of a failure during the update the current state of the system will be recovered without loss of data.

Update notification:

If this setting is enabled, the system will perform a weekly check for a new software version. In case an update is available, the administrator will receive an automated e-mail containing the details of the new version.

Software 5.3.0.7

Software 5.2.0.10
