# T300/T500 display group name module

This module will enable you to show the Group name on the display of the device. Module is available in English and Dutch.

	Description
	General: Add the module to the Gigaset T300_T500 and give the module a name.
	Settings: When activated, Incoming Call: First display the Number or the Name when available and than the Group Name.

> ⓘ **Important**
>
> With the 5.2 release, the P-asserted identity is added in case the user has an N510 or N720 handset. When a user has a N510 or N720 handset assigned to him, the name will not be shown anymore. This because of the format of the P-asserted identity field. Solution is:
>
> - Switch the device type in the PBX from N510/N720 to Standard SIP
> - Upgrade to the 5.3.0.2 Release

Download the module V.103
Tested with 5.2 and 5.3
