

# FAQ T640 T440 Monitor extensions

## Introduction

This will give you the option to get an Busy Lamp field of the system via the user web-interface.

In the web-interface of the user go to: **Menu - Monitor - Extensions**

User is not having an active call.

User is not registered/logged on.

User is having an active call.

User is receiving an incoming call.

It is not possible to call via mouse click on these icons.

## Restart the monitor service

### Question:

When I open this page, the page is empty.

### Answer:

Possible is that the service is not running, you can start this service manually.

Connect via **SSH**

CLI Command to start the service:

```
/etc/init.d/galilei-livemon-server start
```

## Enable the AstButtonDaemon service in V1.0.9

```
root@galilei:~# mv /etc/cron.d/gs-diallog-purge /home/root/
```

A restart of the system is necessary after this command.

```
root@galilei:~# reboot
```
