

FAQ N510 Syslog

Introduction

Via the syslog page, you can enable the device sending syslog messages towards your own syslog server.

How to do this

1. Open the web-interface of the N510: **http:<IP address N510>**
2. Login the N510, default PIN = "0000"
3. Change the URL to: **http:<IP address N510>/syslog.html**
4. Enter the **IP address** of your syslog server
5. **Activate** the syslog server
6. Select **all** syslog messages
7. Try to reproduce the error
8. Attach the syslog messages to the Ticket.

The screenshot shows the 'System log' configuration page of the N510 device. The page has a dark grey background with white text. On the left, there is a sidebar with the title 'System log'. The main content area contains the following fields and options:

- IP Address:** A text input field.
- Server port:** A text input field containing the value '514'.
- Default:** A button.
- Activate Syslog:** A checkbox that is checked.
- Set filter for system log:** A section header.
- New filter settings are valid for future events.** A note.
- System events:** A checkbox that is checked.
- Fault in DECT operating system:** A checkbox that is checked.
- Socket layer events:** A checkbox that is checked.
- SIP events:** A checkbox that is checked.
- eMail events:** A checkbox that is checked.
- RAP events:** A checkbox that is checked.
- Lists events:** A checkbox that is checked.
- Severity mask (hex):** A text input field containing the value '7F'.
- Set** and **Cancel** buttons at the bottom.
