

N720 - Syslog

Introduction

Via the syslog page, you can enable the device sending syslog messages towards your own syslog server.

How to do this

1. Open the web-interface of the N510: **http:<IP address N720>**
2. Login the N720, default Password = "**admin**"
3. Go to: **Settings - Management - System log**
4. Enter the **IP address** of your syslog server
5. **Activate** the syslog server
6. Select **all** syslog messages
7. Try to reproduce the error
8. Attach the syslog messages to the Ticket.

The screenshot displays the Gigaset N720-DM-PRO web interface. The top header shows the brand name 'Gigaset' in orange and the model 'N720-DM-PRO' in white. Below the header, there are two main tabs: 'Settings' (highlighted in orange) and 'Status'. On the left side, a navigation menu lists various settings categories: 'Network and Connections', 'VoIP Providers', 'Mobile Devices', 'Telephony', 'Info Services', 'Online Directories', 'Management' (expanded), 'Date and Time', 'Local Settings', 'Miscellaneous', 'Save and Restore', 'Reboot', 'System Log' (highlighted in orange), and 'Firmware Update'. The main content area is titled 'System Log' and contains the following information:

- System Log**: The system log is stored on an external syslog file server.
- IP address**: A text input field.
- Server port**: A text input field containing the value '514'.
- Activate syslog**: A checkbox that is currently unchecked.
- Filter for System Log**: A section with the note 'New filter settings are valid for future events.' and a list of checkboxes for filtering log events:
 - ☒ System events
 - ☒ Errors in DECT operating system
 - ☒ Socket layer events
 - ☒ SIP events
 - ☒ DECT events
 - ☒ Email events
 - ☒ RAP events
- Events from Base Stations**: A section with a list of checkboxes for filtering log events:
 - ☒ System events
 - ☒ Errors in DECT operating system
 - ☒ Socket layer events
 - ☒ Media stream events
