

Maxwell 10 Screenshots

Introduction

Screenshots are a useful tool to capture whatever is displayed on the screen of the device.

How to enable screenshots

Go to the [web interface](#) of the device.

Select system -> Screenshot

Set Screenshot via reset key to **Yes** and click **Save** to apply the settings.

How to make screenshots

Remove the cover on back side of the device.

When the cover is removed locate the small button and long press it to take a screenshot.
