### About Advoco

Advoco NetPBX® is a flexible cloud based communication solution based on PBX with broad functionality that you can access wherever you are. The basic idea is that you have one phone number but can use whichever phone suits you best at the moment; mobile phone, desk phone at work, soft phone or your telephone at home. Everyone in the company can be accessible on their direct dial number with any phone they choose and they can handle their telephony everywhere in the world in a user-friendly app, or their own personal web-portal.

See below for a list with supported features when using the Gigaset PRO IP Devices on the providers network.
