T640 T440 Release notes 1.0.7

Release date:

October 2015

Version:

1.0.7

What's new:

- Added feature code *93/*93* to enable/disable DND
- Possibility to see on the display which night answer service is enabled
- Added global configuration parameter to control formatting of display names
  - Extensions will display the name according to DISPLAY_FORMAT possible placeholders are "(firstname)" and "(lastname)" and the name is created using sprintf. E.g. a DISPLAY_FORMAT %(firstname)1.1s %(lastname) will result in sprintf("%1.1s %s",$firstname,$lastname. A placeholder can not be used more than once.
- Added quick dial to global contacts
- Direct Dial: Enable direct extension dialing for IVRs
- Provide functionality to assign users to phones including phone resync, list of unassigned users and retrieval of nobody user id's associated to phones

Enhancements:

- First implementations for Manual/ Automatic Call Recording feature
- Office phone number may now be empty in contacts
- Change XML directory elements for home and work phone numbers
- Web-interface: Hostname and domain name added to System - Network - IP configuration
- Extensions are now sorted by lastname from left to right and top to bottom
- N720 add global phonebook.
- 2 Digit extensions are allowed
- Provisioning: Remove N720 syslog parameters.

BugFixes:

- Added missing placeholders in translations
- Caller id number when forwarding to huntgroups
- Queue option "announce hold time"
- Huntgroup, call forwarding no answer.

Known Issues:

- Monitor extension service stopped working.
