

# DE700/900 - Doorintercom (video) / Camera as Screensaver

## 1.0 Introduction

Doorintercom systems with video or Camera's that generate JPG pictures (IP security camera) can be used as screensaver on the Gigaset DE900/700 devices. In Idle mode after 15 seconds, the devices can show the jpg picture of the camera, it will be refreshed every xx seconds.

## 1.1 Configure WEB-Camera in DE device

Name of Webcam	IP address of Webcam (URL)	
Webcam 1	<input type="text" value="http://192.168.178.69/video.jpg"/>	<input type="button" value="Delete"/>
Webcam 2	<input type="text" value="http://"/>	<input type="button" value="Add"/>

First you need to configure the Webcamera in the DE900/700 devices.

Open the web-interface of the DE900/700, go to: **Settings - Services - IP Info Services - Webcam**

1. **Name of webcam:** Enter the name of the Camera
2. **IP address of webcam (URL):** The URL to the Camera picture: Example: <http://192.168.178.69/video.jpg>

Press **Add** and then **Save** to store the settings.

**Info Centre**

The device display can show infos received from a server.  
One of the info services can be chosen as screensaver on the idle display.

Activate Info Services ☒ Yes ☐ No

Please select one info service for screensaver.

☐ News

☐ Weather

☒ Webcam

☐ XML site

On the same web-interface page, set the options:

- **Activate Info Services:** Yes
- **Webcam:** Select the web-camera you would like to show.

## 1.2 Set info service as screensaver.

Go to: Settings - Display

- **Screensaver:** Select "Info Service"

### Wireshark trace

Every 300 ms, the device will load the picture from the camera.
