T300/T500 - Network settings

When you click on the Network tab in the Server Configuration, it takes a long time before the page opens.

You will have a DNS issue. This can cause all kinds of problems.

Solution:

1. Open an SSH connection to the Gigaset T300/T500.

2. On the command line you enter the following command:

dig <IP address DNS server> <DNS name>

Example:

```
[root@T300 ~]# dig 192.168.2.1 gigaset.com

;; Got answer:

;; ->>HEADER<<- opcode: QUERY, status: NOERROR, id: 18325

```

3. Check the Query time.

4. If needed, try another DNS server.

5. Change the DNS server settings in the T300/T500 if needed.
