

Restart PBX module

This module will enable you to restart the Gigaset T300/T500 at a predefined time.

	Description
<div><div>Configuration</div><div><div>Module Configuration: Restart</div><div><div>General</div><div>Settings</div></div><div><div>Name: Restart</div><div>Description:</div></div></div></div>	<p>General:</p> <p>Add the module to the Gigaset T300_T500 and give the module a name.</p>
<div><div>Configuration</div><div><div>Module Configuration: Restart</div><div><div>General</div><div>Settings</div></div><div><div>Set timer when services will be restarted</div><div>Here you can define the time when the Gigaset T300/T500 will be restarted. Please take care that you only do this, once a day/week and during non-working hours. During a restart, calls will be disconnected and the system is 5 minutes not available to make and receive calls. Also Desktop devices will reboot after the restart of the Gigaset T300/T500</div></div><div><div>TIMER</div><div><div>Timer-Interval: Week</div><div>Repeat every 1 Week</div><div>Start (dd:mm:yyyy): 24 9 2013</div><div>Time (hh:mm): 4 0</div></div></div></div></div>	<p>Settings:</p> <p>Here you can define the time and the frequency the PBX system has to restart. When the restart happens, all calls will be disconnected.</p>
