Firmware Hybird 120 Gigaset Edition

Firmware upgrade Hybird 120

You can upgrade the system with the latest Firmware update using:

- Local File
- HTTP Server
- Current Software from Update Server (Online)

Local File

You can download here the latest version and upload this into your PBX.

HTTP Server

Here you enter the URL to your own HTTP server

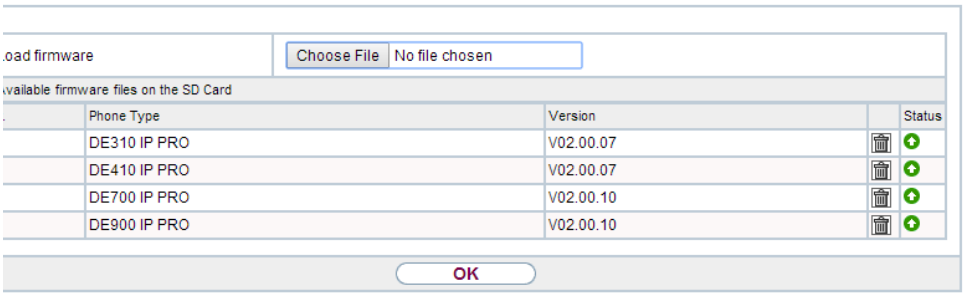

Online

The system will connect to the Gigaset update server to check if a new version is available, here you will always find the latest Official Released software.

Automatic Firmware upgrade Gigaset devices.

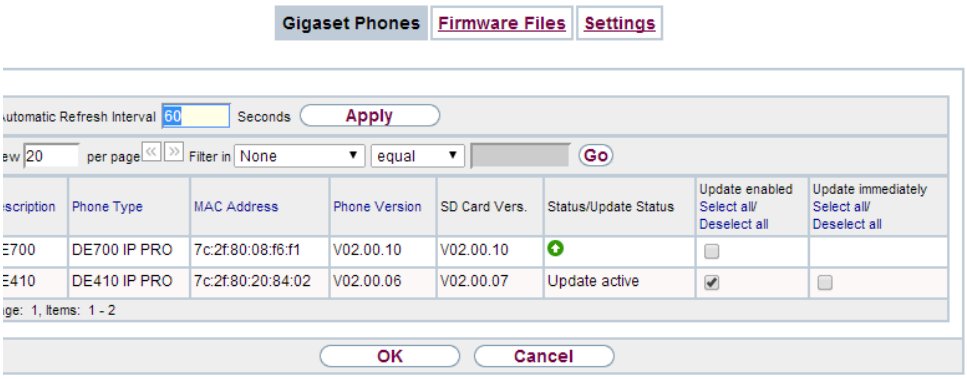

The Gigaset devices behind the Hybird 120 can be upgraded automatic by the Hybird 120, for this you need to upload the latest firmware files.

In the web-interface of the Hybird 120 go to:
Maintenance - Phone Update - Firmware files

Select the special firmware file (See below)

To start the update go to:
Maintenance - Phone Update - Gigaset Phones

- Enable the software update for the devices you would like to update automatically
- If the update should start immediate, you can select these devices. (Device will restart and ongoing call disconnected)
