

DExxx - SIP message support

Introduction

Possibility to send SIP messages to Gigaset Desktop devices.

Messages can be send by SIP platform or with applications like SIPSAK.

Available from software release:

- DE900/700 02.00.09
- DE410/310 02.00.06

Improved behaviour (Do not show name, date and time from message) with:

- DE900/700 02.00.11
- DE410/310 02.00.08

Enable/Disable feature.

Via the web-interface, it is possible to enable/disable this feature. Go to: **Settings - Messaging - SIP messages - Show messages on telephone.**

Send message example.

```
sipsak -i -M -B "Test66" -s sip:de900.ip@192.168.178.89
MESSAGE sip:de900.ip@192.168.178.89 SIP/2.0
Via: SIP/2.0/UDP 127.0.0.1:38405;branch=z9hG4bK.31553a7e;rport;alias
To: sip:de900.ip@192.168.178.89
Call-ID: 1073839576@127.0.0.1
CSeq: 1 MESSAGE
Content-Type: text/plain
Max-Forwards: 70
User-Agent: sipsak 0.9.6
From: sip:sipsak@127.0.0.1:38405;tag=40017dd8
Content-Length: 6
Test66
```

Delete message.

Message can be removed from display by:

- Remove message by sending empty message.
- End/Back key on device, can be disabled. Go to: **Settings - Messaging - SIP messages - Clear message with End/Back key.**
