## Download URL:

How to update:

Via the webpage:

1. Download the software and store this on your own accessible http server.
2. In the web-interface of the N510: Go to: **Settings » Management » Firmware update**
3. Enter the URL for the new firmware in the **User defined firmware file:** field
4. Click on the button: **Update firmware**

Network	Firmware Update	
Telephony	Data server:	profile.gigaset.net/device
Messaging		
Info Services	User defined firmware file:	
Directories	Automatic check for software updates:	⊙ Yes ○ No
Management		
Date & Time		On starting the firmware update, the device checks if the requirements of a successful firmware download are fulfilled. The firmware is then downloaded without additional feedback. During the download and update, the handset / base connection is lost. A successful update results in the handset re-establishing the base connection.
