Asterisk

Asterisk

About Asterisk

Asterisk is an open source
framework for building
communications applications.
Asterisk turns an ordinary computer
into a communications server.
Asterisk powers IP PBX systems,
VoIP gateways, conference servers
and other custom solutions. It is used
by small businesses, large
businesses, call centers, carriers and
government agencies, worldwide.
Asterisk is free and open source.

See below for a list with supported features when using the Gigaset IP devices behind an Asterisk PBX system.

All tests were performed by the Gigaset pro support team.

Version of the asterisk kernel: **V1.6, V1.8**

Dependent on the implementation of the Vendor, also Auto-provisioning and feature sync is possible.
