FAQ N510 Increase SIP Authentication name to 74 characters

Introduction

With N510 software >= 240 it is possible to increase the SIP Authentication name from 32 to 74 characters.

For this you need to use auto-provisioning.

Tag name	Value	Meaning
BS_IP_Data1. ucB_SIP_PASS_USERID_DISP_74_CHAR=0x1	integer	If it's set to 0x1, the SIP Authentication name can be maximum of 74 characters. (Default behavior from software >=240)
		If it's set to 0x0 (old behavior), the SIP Authentication name can be maximum of 32 characters.
