

# FAQ N510 Web-interface languages.

## Introduction

To save memory, the web-interface languages that are from the factory stored in the device are limited to:

- German
- English
- French (From Software 206)
- Polish (From Software 206)

If you want to use another language, the file will be downloaded from the Gigaset server, for this the device needs an internet connection.

If the file can not be downloaded, the English language will be used.
