

T300/T500 - Digium PCI cards - overview

Digium PCI cards

The Gigaset PBX systems T300 and T500 are supporting following cards from Digium:

Analog cards

- TDM440EF PCI CARD 4X FXS EC
- TDM404EF PCI CARD 4X FXO EC
- TDM422EF PCI CARD 2X FXS & 2X FXO

Digital cards (E1 / ISDN30)

- TE122BF PCI CARD 1X E1
- TE207PF PCI CARD 2X E1

ISDN cards

- B410PF PCI CARD 4X ISDN

Because of the used Asterisk business edition for our Gigaset pbx systems, the cards need to have a special programming. These cards have to be ordered via Gigaset authorized distributors.

Normal cards from Digium are not working and not supported. Please find all necessary information about the cards [here](#).
