N720 - Sysdump

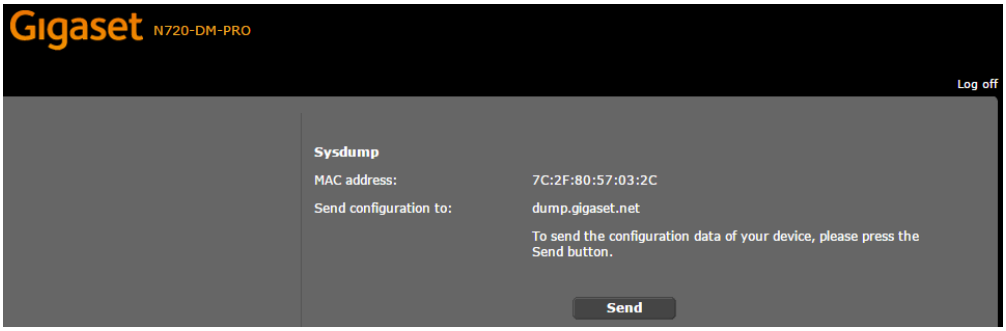

Introduction

Via the Sysdump page, you can make a complete memory dump of the N720. This information will be put on a Gigaset Internet server, the device should therefore naturally have a working internet connection.

Gigaset can use this information to check the device/memory settings.

How to do this

1. Open the web-interface of the N720: **http:<IP address N720>**
2. Login the N720, default Password = "**admin**"
3. Change the URL to: http:**<IP address N720>/sysdump.html**
4. Then you get the page below.
5. Press the **Send** button
6. The information will be stored on the Gigaset server.
7. Please add the MAC address information to the Ticket. (Inform Gigaset via Technical Sales)
