

Commend / Schneider Intercom

Commend International GmbH

Commend develops and manufactures Security and Communication systems for protection of people, buildings and values. The Commend International GmbH was founded in 1971 and is one of the world's largest providers of Intercom Systems.

Rescue forces, fire brigade, police and other security facilities rely on the dependability of this Salzburg Company as well as hospitals and nursing homes. Terminals, modules and stations from Commend for integration of speech, image and data can also be found in control rooms of the German automobile industry, in emergency call systems of subways, such as the London Underground, in many buildings for control of barriers and lifts and increase security on parking lots, parking garages.

Commend products and solutions are long term investments, because they can be expanded and upgraded.
