N720 - Phone-books City field

Introduction

From software 110 or higher we have implemented the option for some phone-books like yellow pages that the City field in the search option is not mandatory.

This is not for fixed providers (kicktel, etc...)

Provisioning

Parameter	Value
BS_XML_Netdirs.CFnotRequired	0x0 = Mandatory (Default) 0x1 = Optional

Patch

In case you have no provisioning possibility, we have here 2 patches that enabled/disables this feature. Just restore this config via the web-interface.

1. Patch to make City field optional
2. Patch to make City field Mandatory
