- DTMF - SIP Info - Wrong Hex code
- Cutting characters in using BLF keys
- Directory handling - eg. visiability of new contacts, searching by Company name

Information

Due to technical design, wireless LAN and Bluetooth Audio should not be used simultaneously

### Firmware update

Recommendations and explanations:

We recommend to insert a miroSD-card or an USB-stick with alt least 2GB to ensure, that there is enough memory available during the firmware update and that it's not necessary to free memory by setting the device back to factory defaults

How to update:

In the webinterface of the Maxwell 10 go to:
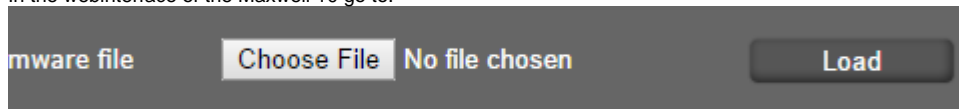

Settings - System - Firmware update

1. Please enter following „Data server" URL: http://profile.gigaset.net/device/beta
2. Press "Save"
3. Press "Update firmware"

Manual

First download the Firmware on your PC and unpack the zip file. You will get a .txt file with the Open Source License text and an encrypted zip file which is your firmware image.

In the webinterface of the Maxwell 10 go to:

Settings - System - Firmware update

Click on **"Choose File"** and select the Firmware file.

Click on **"Load**" to start the upgrade.
