

DE900 - Wireless connection

You can connect the following to your Gigaset DE900 IP PRO:

- A headset via the RJ-9 connector
- A headset via DECT or Bluetooth™
- A mobile phone via Bluetooth™ (Link2Mobile™)
- A handset via DECT

A maximum of one device can be connected via Bluetooth and one device via DECT.

Question:

If I connect a DECT handset/headset and a mobile phone via Bluetooth, can I answer the incoming call via the mobile phone on the handset/headset?

Answer:

No, the DECT and Bluetooth interface share one voice path. They can be activated simultaneously but cannot be used at the same time.
